VISIONS.

There are shadows on my heart,
There are shadows on my brain,
And an ever-ceaseless thinking.
That is half akin to pain:
And I hear the much-loved voices
Of the friends of long ago,
Echo through the halls of mem'ry,
Sweet, and lovingly, and low.

And there come seraphic visions,
Flooding all my soul with light,—
Making life for one brief moment
Fair and beautiful and bright,—
Making all the heart delights in
Robed and crowned with saintly bliss.
Giving us a glimpse of heaven
Through the joys we see in this.

Rosebuds with their lips of beauty,
Blossoms exquisitely fair,
Angel faces we have loved so,
With their wreath of burnished hair,
Red lips pressed to ours so closely,
Hearts that beat for us alone,
Tiny feet, whose every foot-fall
Lingered, when all else was gone,—

And the walk beside the river.
And the elms upon the hill,
'Neath whose verdant shade we loitered
At the eventide so still,—
One by one, as in a mirror,
Pass before my earnest gaze,—
Shutting out the darkest shadows,—
Leading through all pleasant ways.

But anon the vision changeth—
Darkness broods where once was light;
Clay-cold forms and lips of marble,
Only greet my aching sight,
Once again, yea, thrice the boatman
Has been seen upon the tide;
One by one the flowers have withered,—
One by one the loved have died.

This is REAL, and before me
Lies a dark and dreary way,—
Would that I had gone as safely,
Would that I were blest as they!—
They who've passed the "pearly portals."
Opening to a world of bliss!—
They who've gained a crown of glory,
For the bubbles worn in this!

THE ASIATIC CHOLERA—WHAT IT IS, AND HOW TO MANAGE IT.

THE DIAGNOSIS.

The first two stages of cholera consist of, first, diarrhea; secondly, of a species of vomiting, wherein the patient does not generally experience nausea but simply throws off fluid from the stomach, as in the emetic operations which accompany dyspepsia, or indigestion; then commence the cramps, which in some cases, are not very severe, in others frightful and most agonizing; this stage almost immediately succeeds the evacuations of what has been aptly termed "rice water," from its similitude to that substance; and indicates conclusively that the natural faces have been entirely discharged. This fluid is thrown off from the multitude of minute blood-vessels situated on the surface of the intestines, and consists of the serum—a fluid principle of blood. It is the discharge of this fluid, which, from the commencement of the diarrhea, incorporating with the ordinary contents of the bowels, causes the fluid state of the evacuations, which pass generally without pain or much inconvenience, and, therefore cause no alarm until the whole fluid portion of the blood is thus discharged; superinducing the third stage of debility, cramps, blue skin, loss of pulse, cold sweats, clenched fingers, cold tongue, and an indescribable coldness of the whole body. The vomiting still continues with continued evacuations, with violent cramps, difficult breathing, and loss of the power of speech, and a terrible loss of the substance around the eyes, causing them to sink even deeper than those of a corpse; and this in so short a space as to be incredible to those who may not have witnessed it.

And this is the effect of the diarrhea, which is so insiduous as to give no concern to the patient until the vomitings commence and which produces, nevertheless, the loss of all the circulating fluid of the blood-vessels, and those terrible results called "cholera." In fact, the disease is not cholera-morbus, but rather a diarrhea of an insiduous and most extraordinary character; and had it originated in this country, or in Europe, would no doubt have been so considered and classified; but the Asiatics (indifferent judges in such matters), are so wanting in reflection that they observe only the sensible changes which appear towards the close; and disregard the diarrhea being so free from pain, and not calculated to excite alarm, but which is nevertheless the real malady.

To illustrate more clearly my idea of this disease I will state the effects produced by the operation of bleeding with the lancet, until faintness is produced; then indicate the similitude of this state with the cholera, and afterwards point out the difference in the symptons, and the difference.

When the lancet is inserted in the arm of a patient to effect a copious flow of blood, he experiences no inconveniences until a considerable quantity has been taken away; and if he should be lying down, the quantity may be quite large before any constitutional effect manifests itself. In surgical practice, when it is desirable to produce faintness, the patient is bled standing, and the effect is more rapid, caused by the gravitation of the blood, which, in an erect posture, inclines downwards, leaving the brain, heart and lungs without stimulus; faintness is the immediate consequence; but in a recumbent position, these organs maintain their action for a much longer time, because the loss of a considerable quantity is required before the volume of circulating fluid is sufficiently reduced to cause a suspension of the functions of those vital organs, and to produce syncope or fainting. After some minutes the arteries contract upon the reduced mass of blood re-establishing the relation between their capacity and their contents; the circulation recommence, the the patient revives, and, maintaining a horizontal position, is soon relieved.

But any one who has been present at this phenomenon of syncope will have noted the cramps and nausea which generally accompany it; in this case, the surface of the patient is very pale, while in cholera it is equally remarkable for the blue color of the whole surface. The reason is obvious: in the evacuations of water by means of the copious sweats and the diarrhea all the coloring matter of the blood remains behind, and for the want of fluid ceases to circulate; the arteries cotinuing to pulsate, precipitate these particles into the minutest vessels, and there deposit the oxygen they may have acquired in passing through the lungs and absorb carbon, which imparts the blue color to the skin; and this change of color is the only difference there is between the last symptoms of cholera and those of excessive blood-letting.

THE REMEDY.

Let me here say that these curative directions may be relied on. I have seen, professionally, two or three hundred cases, and many more in hospitals. In my practice I have not lost a single one.

Summarily, remember always, that this disease is of the intestines solely, commencing with diarrhea until two or three evacuations per day, causing, generally, no pains, and slight as to cause no alarms. This is strictly, and in itself, the disease; and in distinction from ordinary diarrhea must be stopped: and this cannot be done with too great promptness.

Indeed, immediately that the epidemic influence manifests itself in a community, the inhabitants should adopt a stringent diet, avoid all purgatives and every purgative element, living principally on rice in its various modes of preparation, fresh meats (that is not salted), roasted or boiled, or beef or mutton. Boiled eggs, chicken broth or soup, very little salted, and warm drinks in place of cold ones. Avoid as poisonous all acid fruits and vegetables. Even potatoes have been discharged undigested after a lapse of twenty hours, and that by a robust man, previously of good health. Every kind of fermented drink, as beer, ale, porter and cider, is also very bad. In no case, during the prevalence of the disease, should warm or fresh bread be used, and none less than a day old.

Should one feel attacks, by the diarrhea or dysentery, the most perfect quiet in bed should be enjoined, with a light and nutritious diet, with warm drinks, with injections of laudanum in one or two tablespoonfuls of warm water—a dose of laudanum being a teaspoonful to a tablespoonful, according to the force of the diarrhea. If, with this treatment, the diarrhea is checked, although the debility of the stomach continues, or, so to speak, the inclination to vomit, it is of no consequence; the same thing occurs in taking the blood from a patient in the ordinary way. His nausea is of no importance, neither his faintness and prostration, provided the bleeding is stopped, because so soon as this is effected, all these cease spontaneously. So, in this disease, suppressing the discharge from the blood vessels of the intestinal canal by opiate and astringent injections, the patient is saved. At the same time he might take ten or twelve drops of saturated tincture of camphor, as a restorative and anti-spasmodic cordial, every hour, until it produces a copious perspiration. At the same time he should be kept well covered in bed with hot bricks or bottles filled with hot water at his feet.

An excellent preparation to stop the diarrhea is the chalk mixture, and is prepared of half ounce of prepared chalf, half ounce of tincture of kino, half ounce of elixir paragoric, two drachms powder gum arabic, two drachms powder sugar, three ounces pepermint water.

In cases of violent diarrhea, a wineglassful may be taken at once; when not so violent, a tablespoonful every two hours, or oftener, if the evacuations continue.

Mustard plasters on the bowels, when there is much pain, are of excellent effect.

As soon as the patient feels himself relieved, he believes himself cured and able to go about his usual occupations, and is generally anxious to go out; this, however, is extremely hazardous; and, that the cure may be thorough and complete, he should be kept in bed and wholly quiet for, at least, two or three days; a relapse is fatal.

I should caution against the use of laudanum by the mouth, in place of injection, first, because its action is less prompt upon the intestines, the seat of the disease; and, secondly, if taken into the stomach it obstructs and oppresses its functions, confuses the brain, and renders respiration difficult—while, by injection, none of these evils are perceptible.

The chalk mixture, in many cases, is all that is necessary, if administered early; but the opiate injections are invaluable and the camphor ought to be taken at the same time.

It is necessary to inculcate the greatest cleanliness of person and habitation; quietude of mind; to avoid fruits and vegetables; not to use strong or fermented liquors, or to eat, except very lightly; thus an attack will be avoided, and when not so, it will be rendered less dangerous.

WOOLLEN CLOTHING.

The most healthful clothing for our climate, the year round, is that made of wool. If worn next the skin by all classes, in summer, as well as winter, an incalculable amount of coughs, colds, diarrhœas, dysenteries and fevers would be prevented, as also many sudden and premature deaths from croup, diptherie and lung disease. Winter maladies would be prevented by the ability of a woollen garment to keep the natural heat about the body more perfectly, instead of conveying it away as fast as generated, as linen and flaxen garments do; as also cotton and silk, although these are less cooling than Irish linen, as any one can prove by noticing the different degrees of coldness on the application of a surface of six inches square of flannel, cotton and linen to the skin, the moment the clothing is removed. The reason is, that wool is a bad conductor of heat and linen a good conductor.

It is more healthful to wear wollen next the skin in summer, because it absorbs the moisture of perspiration so rapidly, as to keep the skin measurably dry all the time. It is curious that the water is conveyed by a woolen garment from the surface of the body to the outer side of the garment, where the microscope shows it condensed in millions of pearly drops; while it is in the experience of the observant, that if a linen shirt becomes damp by perspiration, it remains cold and clammy for a long time afterwards: and unless removed will certainly cause some bodily ailment.

In the night-sweats of consumption, or of any debilitated condition of the system, a woollen flannel night-dress is immeasurably more comfortable than cotton or linen, because it prevents that sepulchral dampness and chilliness of feeling, which are otherwise inevitable.

The British Government make it imperative that every sailor in the navy shall wear woolen flannel shirts in the hottest climates. The shrinkage of woollen garment in washing, whereby they become hard, impervious and board-like has prevented their more general use; but there are three ways of preventing this, to a greater or less extent: either let about one fourth the material be made of cotton: have it dyed red some other color before it is woven; or if it is greatly preferred that it shall be white, exercise proper care in the process of washing.

REVELATIONS FROM FOOTE.—The irrepressible Henry S. Foot, who springs up again, like a jack-in-the-box, every time cruel Fortune pushes him down, appears now at Nashville. In a letter to the Nashville Dispatch, he makes the following statements, after denying that the President imposed any terms to his release:

After struggling in Richmond for three years to prevent the adoption and inforcement of conscription, confiscation, the suspension of the writ of habeas corpus, the proscription and punishment of conservative and upright citizens for the conscientious entertainment of Union sentiments; after resenting, to the full extent of my ability, the gross mismanagement of Confederate concerns, both military and civil, up to the period when, after the displacement of General Joseph E. Johnston from the command of the Army of Tennessee, and the deliberate opening of the whole South to the invading army of General Sherman; after foreseeing and formally predicting the downfall of Savannah, Charleston, Columbia, Wilmington and Richmond, before the first day of last May, it is known to all that I labored in every way for peace, in order to avoid the very state of things which the South is now experiencing. Then I knew, and I am now prepared to establish, that President Lincoln was ready to grant peace to the South on the basis of universal amnesty, gradual emancipation, and $400,000,000 to the slaveholding population of the South. In point of fact, President Lincoln offered these generous terms to the three Commissioners whom he met in the Hampton Roads last winter; but their hands were so unwisely tied up by instruction from President Davis, that it was not in their power to accede thereto. They were not even allowed to report the propositions of Mr Lincoln to the Confederate Congress.

SETH KINMAN AND HIS PRESENT.

We have already printed a description of the chair, which Seth Kinman, the Western hunter, made out of the skins of four grizzly bears. The Washington *Chronicle* thus describes the scene at the White House, when the old man presented his gift to the President:

"The door of the room had been thrown open, and without introduction or formal ceremony, the hardy pioneer of the wild Pacific slope, the conqueror of wild beasts and wild men, grasped by the hand the honored President of an all-powerful republic. Kinman was evidently no stranger to the President, who received him in the most cordial manner.

Leaning upon his rifle, and as calm as though he had been conversing with a prairie, he stated to the President that recently he had been up in Pennsylvania constructing a chair from the skins of several grizzlies which he had killed with his own rifle and which he desired to present to him. That in offering it as a token of respect both to his person and his office, he desired to say that in his opinion the "President of these United States was the biggest man in the world."

The President was much gratified at this emphatic compliment, and in returning thanks, said he thought he knew how to appreciate both it and the chair.

The President here insisted that Seth should first sit in the chair, after which he sat in it, praising highly its beautiful and comfortable qualities. The 'bear-killer' in the meanwhile had become so much at ease in his intercourse with the President that he descanted and chatted upon the prominent points of his gift with perfect *nonchalance*. This originated however, from no want of respect to His Excellency, but rather from a buoyancy of animal spirits, and genial good nature, which has won for Kinman a host of friends wherever he is known.

After displaying all the parts and points of his wonderful chair, calling attention to the formidable claws that clustered on its sides, the natural feet of the animals on which it rested, the old hunter paused. It was plain, however, that something remained to be told, something startling to be shown, and the Rocky Mountain speaker had not pronounced his peroration. Carefully unloosing the cords which concealed the huge head, he suddenly darted it, snapping and gnashing its teeth, close to the President's knees, which was received by the crowd with uproarious laughter, and heartily enjoyed by the President himself.

The grown children of His Excellency, several in number, now came in, and were loud in their demands to be shown again and again this wonderful feature of the chair. No one seemed to enjoy their delight and fun more than the President, whose careworn face was lighted up with benignant smiles, and whose stern nature seemed to have relaxed and grown cheerful over the pleasing incident. The crowd of their own accord now withdrew, leaving Kinman almost alone with the President. At last, however, upon suggesting to His Excellency that he should keep the head of the grizzly well protruded in order to frighten off office seekers and unrepentant rebels who besiege his mansion, and receiving a warm invitation to visit the White House at his pleasure, the worthy old hunter withdrew, well pleased at his reception and success."

CHECKING PERSPIRATION.

Edward Everett, the finished orator, the accomplished diplomatist, the orator, the statesman the patriot, became overheated in a court room on Monday morning, went to Faneuil Hall, which was cold, sat in a draft of air until his turn came to speak: "but my hands and feet were ice, my lungs on fire. In this condition I had to go and spend three hours in the court-room." He died in less than a week from this checking of the perspiration. It was enough to kill any man.

Professor Mitchell, the gallant soldier, and the most eloquent astronomical lecturer that has ever lived, while in a state of perspiration in yellow fever, the certain sign of recovery, I ft his bed, went into another room, became chilled in a moment, and died the same night.

If, while perspiring, or something warmer than usual, from exercise or a heated room, there is sudden exposure in stillness, to a still, cold air, or a raw, damp atmosphere, or to a draft, whether at an open window, or a door, or a street-corner, an inevitable result is a violent and instantaneous closing of the pores of the skin, by which wastes and impure matters, which were making their way out of the system, are compelled to seek an exit through some other channel, and break through some weaker part, not the natural one, and harm to the part is the result. The idea is presented that the cold is settled in that part.

A lady was about getting into a small boat to cross the Delaware; but wishing first to get an orange at a fruit stand, she ran up the bank of the river, and on her return to the boat found herself much heated, for it was summer; but there was a little wind on the water, and the clothing soon felt cold to her. The next morning she had a severe cold, which settled on her lungs, and within the year she died of consumption.

A stout, strong man was working in a garden in May. Feeling a little tired, about noon, he sat down in the shade of the house and fell asleep. He waked up chilly. Inflammation of the lungs followed, ending, after two years of great suffering, in consumption. On opening his chest there was such an extensive decay that the yellow matter could be scooped up by the cupful.

Multitudes of women lose health and life every year in one of two ways: by busying themselves in a warm kitchen until weary, and then throwing themselves on a bed or sofa, without covering, and perhaps in a room without fire; or by removing the outer clothing, and perhaps changing the dress for a common one, as soon as they enter the house after a walk or a shopping. The rule should be invariably to go at once to a warm room and keep on all the clothing for at least five or ten minutes, until the forehead is perfectly dry. In all kinds of weather, if you have to walk and ride on any occasion, do the riding first.—*Hall's Journal of Health.*

INDIAN ROAD AGENT.—We find the following in the Alpine *Chronicle*, of October 14th:

On last Wednesday, as John Poe, of San Jose, was coming to the city over the Amador road, about two miles the other side of Horsley's station he met an Indian with a bag of acorns on his back. As Poe approached, the Indian stopped, and laying the bag on the ground, drew his bow and arrow on Poe, accompanied by the pleasing remark: "You give me your money or I kill you." Poe very considerately came to a conclusion that what money he had with him would do as much good in Alpine county as it possibly could in the hands of a redskin, and having no weapon, jumped behind a pine tree and made a break for the chaparral, and by keeping the tree in range with the Indian and making a detour, struck the road at the toll-house, where he told of his adventure, and pursuit was made for the red devil, but with what result we have not learned.

As George III. was walking the quarter deck of one of his men-of-war with his hat on, a sailor asked his messmate, "Who that fellow was who did not douse his peak to the Admiral?" "Why, it's the king." "Well, king or no king," returned the other, "he's an unmannerly dog." "Lord, where should he learn manners," replied Jack, "he was never out of sight of land in his life."

CAPTAIN PICO'S RECENT RAID INTO SONORA.

A member of one of the California companies at Fort Mason, Arizona, writes to his father at Sacramento, under date of September 16th, as follows:

I make a long jump in my letter; I could not get it off last mail, and the next day myself and Captain Pico and thirty men started for Magdalena (Mexico,) some ninety miles south from here, to try and recover some United States property, stolen by deserters from Captain Pico's company. We were two days in going there, and through a beautiful country, the hills covered with oak and cedar timber. I think it one of the finest countries I ever saw. As I said before, the French have full possession of Sonora, but there are no French soldiers at Magdalena—only Mexicans who have taken up with the Empire, and of these we found 250, poorly armed (mostly with flint lock guns), and clothed with no uniforms of any kind, neither officers nor men. We saw no flag amongst them whatever, though I believe the Imperial flag is the same as the old Mexican, except the eagle has a crown. The Frenchmen took pity on the bird that had been out in the sun for so long, and gave him a hat. When we arrived at Magdalena, Captain Pico and I rode into town and demanded the property and men, but they refused to give them up until they could hear from the French officers at Hermosillo, and that would take some eight days. In the meantime we sent all the men but six back, and the Captain and I remained to hear their answer, which came at the time specified, but they refused to give up anything, and ordered us to leave the town within eight and the State in forty-eight hours. Under the circumstances we had to leave without either men or property. Everything was carried on in writing, and for that purpose the Colonel sent me. I have copies of all our correspondence, which I will send you as soon as I have time. We could hear of remarks being made that they would like to take us prisoners and shoot us the same as Crabb's party, and at one time I did think they would try to take us. The French cannot hold Mexico long. All the better class are opposed to them. Their adherents are only the low out-and-out half-Indian class. We were treated with all kindness by the better class of citizens. They gave us three fine dinners, and their greatest wish is to have the United States side with them against the French. You may rest assured something will grow out of this affair. It seems only a little thing at first, but if they are permitted to protect deserters, as they have done, we might not have a soldier here in a week. To-night I have just received a letter from Magdalena stating that only a few hours after we left there, they sold at public auction the horse equipments, etc., of the deserters (they were cavalry.)

A MOTHER'S LOVE.—I have stood beside the mother when the terrifying intelligence of her infant's death was first announced to her, and she bent over its lifeless form and wiped away the cold death-damp from its. I have noted the deep intensity of her holy affections, as she gazed upon its glassy, motionless eye, sunk beneath its half-closed lids, and its graceful limbs livid and stiffened by the tomb of death. I have listened to her stifled shriek, and seen her turn away from this last remnant of mortality—a lone, desolate and heart-stricken being. From the first moment of that infant's existence, her heart-strings had been twining around it, until every holy feeling that a mother's love ever knows, every fond hope that a mother's love ever forms, every cherished idea of purity and virtue, and innocence were centered upon it, so that in its death she heard the knell of all her worldly hopes, of all her bright visions of the future. The hope that he would soothe her sorrow in after years by his filial love was crushed, the cherished expectation that he would watch by her bedside at the hour of her departure, to close her aching eyes, to whisper her farewell,

"To breathe a deep sigh to winds that murmur low,
And think on all her love and all her woe."

was swept away, and she was left, bereft of solace, and sadly convinced that her hopes were "as the baseless fabric of a vision." Oh! who can measure the extent of a mother's deep and sacred love for her offspring! It cannot know change! It gushes forth in its holy power as she watches the couch of slumbering innocence, it lives in its freshness and beauty when her child has assumed the station and duties of manhood, and when time wrinkles the features and palsies the hand it obeys, her last prayer is that her child may be blessed—her last look of tenderness was for him alone.

CARNIVAL OF WAR.—A New York paper, which professes to have had access to official records, gives the number of killed, wounded and missing of the Federal army during Grant's campaign in Virginia and Sherman's operations in Georgia. The time included is from May 4th to November 1st, 1864. It is remarkable that some of the less noted battles were more destructive. In Grant's department, the killed, wounded and missing are summed up as follows:

Wilderness	29,410
Spottsylvania	16,381
North Anna	1,907
Cold Harbor	13,153
Petersburg	9,965
Petersburg	5,318
Petersburg	4,008
Trenches	968
Welden R. R.	4,543
Ream's Station	2,432
Peeble's Farm	2,680
Trenches	2,417
Boydton Plankroad	1,902
Total	94,897

The losses of the grand army of the Mississippi are as follows:

Army of the Cumberland	22,807
Tennessee	10,314
Ohio	3,769
Total	36,890

This report does not extend beyond the first battle of July at Atlanta, in which 4,000 were killed and wounded. Although over 32,000 of General Sherman's men were medically treated, only 420 died from disease. Of artillery amunition the Armies of the Cumberland, Tennessee and Ohio expended together 149,670 rounds; of small ammunition, 22,137,132 rounds. We may add, that the Grand Army of the Mississippi captured and received an aggregate of 12,983 prisoners and deserters during the active operations ending with the fall of Atalanta, of whom about twenty-five per cent came voluntarily into our lines.

THE BABY'S CHANCE.—According to the latest information on such subjects, the chances that a newly-born infant in England, will live for the space of twelve months, are 861 to 140. Babies born in France are not quite so fortunate, the chances in their favor being only 820 against 180.

WHEN Voltaire was ordered by the Directors of Geneva to quite the dominions of the little Republic in twenty-four hours, the incorrigible scoffer, as all things venerable and sacred replied: "Magnificent Sirs, it requires only three minutes."

A brutal murder was committed recently in San Louis Obispo, Wash Biddle killing David Wood.

Curs'd be the hand that dares to pull thee down.

CATHOLIC SERVICE.—We are requested to state that the Rev. Father Callan will hold Catholic service in this place to-morrow morning at the usual hour, and at Iowa Hill on Wednesday, being the feast of all saints—the 2d November.

THE ELECTION.—As we predicted, the election for judicial officers resulted—in this county—in an overwhelming majority for the Union candidates. Many of those who sought strange gods at the September election came back to their old choice, and are now numbered with the faithful to the undying principles of the Union party. This is what might naturally have been expected from those who, anxious to be right, but allowed the traitor counsels of a few in the Bolter interest to swerve them in their actions, now see their error, and curse the men who had planned their disgrace by inducing them, through specious sophistry, to forget the teachings of their fathers, the precepts of religion, and the promptings of patriotism to lend their aid to disrupt our great party. Those who were most blatant in their abuse of the nominees of the Union party, who were "bending the supple hinges of the knee" to the traitors who had during the late terrible struggle been foremost in their denunciation of the Government now see the utter hopelessness of the cause they espoused—not through principle, but money. They have found out that the people will not tolerate a one-man power, that no one, however exalted his position may be, can dictate to the great American people the measures or men they shall adopt or endorse. It is a lesson some of the would-be leaders will long remember, and one that should have been long since administered.

GONE.—We were truly sorry to learn of the death of MARCUS KIMBALL, of this county. He died at the Dardenelles claim, near Forest Hill, on the 19th instant. He had been ill sometime, and although his demise may have been expected at any time, yet many of those who knew his worth, integrity and eminent social qualities are doubtless surprised as well as grieved. Mr. KIMBALL was from Massachusetts, and came to this State in 1849, and has been here ever since. He was at one time elected Tax Collector of this county and no man ever discharged the duties of an office with more industry and conscientiousness than he. He was the last of the original owners of the famous Dardenelles diggings, and no one deserved the smiles of Fortune more than the subject of this notice. He leaves two brothers in this State to mourn his loss. May the sod rest lightly upon his grave, and at sound of the bugle at the last day, may he arise clothed in the habiliments of the blessed, the company of whom his honor, kindness and natural goodness of heart so eminently fitted him.

HOSE.—We are glad to see that some of our most prominent citizens are exerting themselves to purchase leather hose for fire purposes. We learn it is the intention of those having the matter in hand to get up a ball some time during the coming month for the purpose of raising money for the purchase of a sufficient quantity of hose to be used in case of emergency. They intend, we believe, to give a supper and dance; the proprietor of the Dutch Flat Hotel, Mr. Seffens, generously proposes to furnish supper for fifty persons, and those engaged in the enterprise inform us that the ladies have signified their willingness to supply any deficiency there may be by donating as much more as may be needed. This being the case we see no drawback in having a social dance by which sufficient may be collected to purchase the necessary apparatus. We hope our people may persevere, we need good hose now more than anything we know of; having excellent water-works, well attended, the lack of hose is the only draw-back, *with* which, the property of our citizens would be comparatively safe, for the force obtained by the altitude of the reservoir is sufficient for all purposes, common and extraordinary.

DWELLING ROBBED.—On Thursday, the 26th instant, during the temporary absence of the wife of Mr. S. Holmes, superintendent of the Yuba ditch, who resides about one mile from town, was entered by some thief who robbed the house of a lady's gold watch, a locket, containing the likeness of a child, thirteen dollars in coin, and a diamond breastpin valued at eight hundred dollars. This is the second burglary committed this week, and is probably attributable to the near approach of the railroad. Look out for more depredations.

A CANDIDATE.—We learn that M. D. Boruck, Esq., the talented editor of the San Francisco *Spirit of the Times*, will be a candidate for Clerk of the next Assembly of this State. Mr. B. is a thorough Union man, one qualified for the office, and will probably carry more votes on the first ballot for the office for which he is a candidate than any man in the State. Besides, he is a first rate fellow, and we hope he will get the office.

MORE UNION VICTORIES.—By dispatches received by the Associated Press, we learn that the following splendid Union victories have been recently won: Ohio, 50,000, majority: Iowa, 20,000 majority; Pennsylvania 16,000 majority. "Whar" now is the g-r-e-a-t "Dimmicratic" party?

CABIN ROBBED.—A cabin situated at the end of Main street, was entered on Tuesday evening while the owners were at work in the diggings, and robbed of eight dollars in coin and a gold watch, valued at eighty dollars. Persons cannot be too careful in securing their premises in leaving them, as "no man knoweth" when the light-fingered gently cometh.

NOTICE the new advertisement of Mr. Burckhalter in another column. He has for sale nearly every article of consumption and all kinds of implements of trade and use. He says that he is determined to sell all articles at prices that are bound to satisfy. We rather think the stone store is slightly ahead now.

RETURNED.—Our fellow-townsman J. D. Hilton, who has been paying a visit to his friends in the Eastern States returned on the stage on Thursday. We are glad to hear that he is well and hope he found his friends at home "enjoying the same blessing."

—Eastern papers by the last steamer arrived here yesterday at noon.

being injured here by exaggerated accounts of the earthquake; it is reported to have been something very alarming Please have a correct statement forwarded me for publication.

H. W. CARPENTER.

Yesterday the Chamber of Commerce made provisions to have a full and true account of the affair telegraphed to New York, which will doubtless allay the fears existing in that city. It would be interesting to know what outrageously exaggerated statements have been telegraphed East in relation to the earthquake, and who sent them. Wonder if they were sent by those sensation writers who have been endeavoring for the last ten days to prove, through the columns of a city journal, that San Francisco had been ruined by the shake? One of the *Bulletin* proprietors sends the regular news dispatches East. Did they contain the exaggerated statements which have injured the credit of this State?

The above we clip from the San Francisco *Call*, the editor of which appears to think that some one has been exaggerating the damages sustained from the late earthquake in order to impair the credit of San Francisco. We do not know, of course, how true this may be, but it appears to us from what we have heard from persons who have visited the bay city since the earthquake, that a simple narration of the *facts* alone, would be sufficient to "shake" the confidence of capitalists at the East about as bad as the late "shake" did San Francisco, which, we learn was nearly to the foundation of the most substantial buildings in the city. It is an unfortunate coincidence, the proprietor of the Lick House employing ten or fifteen plasterers to go over the house so soon after the quake. It looks as though the shock had something to do with putting the house out of repair. We would certainly do nothing to injure the credit of San Francisco but truth compels us to say that life, on occasions of earthquakes is *rather* unsafe. There may probably be no more shakes in that city, but we should hate to take our chances there expecting to live to a "ripe old age."

FENIANS.—A number of detectives, says a late New York *Herald*, arrived from London in the first steamer, with special instructions, it is understood, to keep an eye on the Fenians, and inform the English Government from time to time of what ever facts may come to their knowledge in regard to the order. One or more of these detectives, it is said, left for Chicago, where it is believed the Fenians are organized in greater strength than anywhere else in America except in New York and its vicinity. It is understood that the Fenians have lately adopted more secrecy in their communications and actions than was formerly observed.

The Fenian army is estimated as follows:

Limerick	6,000
Krery	1,500
Cork	11,500
Waterford	1,000
Tipperary	7,000
Kilkerny	800
Wexford	1,200
Wicklo	1,000
Ctare	500
Kildare	500
Dublin	8,000
Total	39,000

This makes a total of thirty nine thousand men, and if we estimate for the northern counties of Ireland, where Fenianism is at present weak, and the English has strong holds, ten thousand men, we give the movement as many men as Lee had in his celebrated raid into Pennsylvania. Add to this number what the Fenians claim in the United States, 100,000 men, and we give an army sufficient to carry out their projects provided they could get into Ireland as Grant did into Virginia. But the case is different; England's attention will be strictly and solely devoted to this move, and we predict for the whole concern a magnificent failure, both for the want of men and means.

A COMPROMISE.—The Marysville Appeal knowing the importance attached to election franchise by those who make a great noise about negro suffrage, offers the following as a compromise, with a moral:

"We have a compromise to offer on the negro-suffrage question. It is well-known how difficult it is to get people out to the polls on election-day. Only about half the people voted at the last election. Now for our compromise, which is this: Every white man who does not appreciate the rights of franchise cannot object to those who would. Therefore suppose they delegate this right to so many intelligent colored men. If the elective franchise is not worth exercising, those who deem it so need not object to this "sliding scale" we propose. *Moral*—what a fuss some folks make about the exercise of franchise, a right they will not exercise themselves."

SLUICE ROBBER CAUGHT.—The Nevada *Transcript* of the 24th gives the following account of the arrest of a sluice robber near that place. It appears that the aborigines are becoming civilized as fast as the most earnest could wish. Only the other day in Alpine county, a buck drew his "bow and arrow" on a traveler, demanding at the time, "your money or your life:

"On last Saturday Henry Butterfield captured a "dusky son of the forest" in the act of robbing the flume in Little Deer Creek. The Indian was sitting down in the flume, busily engaged in cleaning out between the riffles with a crevicing spoon. So intent was he upon his work that he did not notice the approach of Mr. Butterfield until the latter had him by the hair. Notwithstanding the protestations of the Indian to honesty, Mr. B. "yanked" him out of the flume by the hair and confiscated his tools, together with the well-filled pan of dirt taken from the riffles. The Digger then received a severe application of leather, of which no doubt he yet has a lively recollection."

COMPLIMENTARY.—The editors of the Marysville *Appeal* and Placerville *Democrat* are just now engaged in a tournament of words:

Who denies the doctrine of total depravity?—*Marysville Appeal.*

We do not. You are a living monument of "total depravity."—*Mountain Democrat.*

The editor of the *Democrat* is one of the mummies of the petrified Democracy.—*Appeal*

Look out, Mr. Appeal, you'll "fire Dan's heart" and then "he might hurt somebody."

A TERRIBLE FALL.—On Saturday night, October 21st, about eleven o'clock, John G. Apple, employed in the Justiss mine, below Gold Hill, Nevada, fell down the shaft of the mine, the distance of 330 feet, where he struck a platform, went through into a sink 20 feet below, killing himself instantly. He, with Bawden, who had been at work with him, had just been raised from the shaft, and the upper platform breaking, precipitated Apple down the shaft. He was a native of Germany.

...ited upon, to mourn the death of many unfortunates, having been caused by the explosion of the steamer *Yosemite*. Scarcely more than a year ago, Captain Poole assured us through the public press that travel or passenger's on the "Old Line" and in particular on his boat were safe. We took it for granted; but, Alas! He has cast stones at those living in glass houses, when he was living in a glass house himself. I was an eye witness to the fearful castrophy of the steamer *Pearl*, saw the victim of the ill-fated steamer *Washoe*—but oh, God! it is awful; we beseech, and humble pray Thee to protect and spare us from any more such calamities. Our streets present now an unusual lively and brisk appearance, in the way of teams and provisions arriving every day—which would surely make the business men of the *Deutsche Flache*, jealous to behold, most the goods in the grub line, are consigned to L. Salomon & Brother, whilst the clothing and dry-goods go to the celebrated clothing stores of Mr. Ladd and Mr. Rosenburg. Mr. Solomon says that his customers are good as long as he is. Good! we just need such kind of gentlemen as you are. Mr. Isserman of the Hotel de Orleans says: I do not criticise enough—better keep quiet, sir; or I'll let out about the fourth of July dinner, and don't stuff us to death with your ever lasting tables, we are not French. C. Huppert is at his old stand yet, and the venerable John Schmidt of the *Boomerang* continues to administer the headache; yea, too often to your humble correspondent. With the exception of high heels, Mr. Klein has made me as fine a pair of boots as ever F. C. T. Shubert did—I advice all to give Mr. Klein a call. *Cartes de Visites*, is all the go now—(though not such as Johnson has taken on Clay street.) The artist is reaping a 'golden harvest,' can't meet a person in the street but what he'll out with his pocket book and politely ask you to "take a card," I'd say more, if it wasn't for *ye Editor protem*. But hold! pretty fac s are in great demand among masculines. Mr. P. Stone our Justice of the Peace *elect*, is walking about town with a very long and sober face, warns everybody not to put his name up for office hereafter. By the way, our mail carrier Mr. Morrison, is about going to stop bringing us any more mails, from the fact that he hasn't received any compensation from *Uncle Sam* for over six months. Oh, will it not be delightful—instead of perusing our papers and letters—we will have to suck our thumbs for pastime? It will please many of our citizens, if the servants of Uncle Sam at the Bay see to this matter—that the carrier gets his pay.

It is amusing to notice the good effect of a little publication in a paper. The journals I wrote about in my last are coming regularly as clock-work. That's right gentlemen—deal fair with us, and you'll reap reward accordingly. The assertion of *Ike* being *mente roptus* is "play'd out," and to those who borrow the ENQUIRER'S from stores and saloons, and forget to return them, I would say; to remember, that "honesty is the best policy." Our church going community is in high glee over the fact that the Rev. Mr. Wibel, Methodist Minister, is to remain here, for how long a time, your correspondent knoweth not. The very able and eloquent discourses of the above named gentleman and the sweet strains of the choir led by the charming voice of Miss Rich will long be remembered by all who have attended them.

I have taken the hint of *ye Editor protem*, and conclude it best to abide by it—would like to catch *ye* out some good day and choke *ye* with the consents of "oyster boxes" and "champaign bottler;" I mean particularly *ye*—nothing more—except the Morning Star had a clean up of seventy-eight ounces, and the Lebanon has levied another assessment.

IKE.

THE Sacramento *Union* says that S. S. Montague, Engineer of the Pacific Railroad, has just returned from the summit of the Sierras, which point he visited for the purpose of starting the work on the summit tunnel. This tunnel will be 1,750 feet, or about the third of a mile long, twenty-six feet wide and twenty feet high. The excavation will be sufficiently wide for a double track. The entire work runs through solid granite. It is expected that a year and a half will be required to complete it. The work was started by Montague at both ends. This tunnel is not level, but descends to the east at the rate of ninety feet to the mile. The summit is about fifty miles of Colfax. Thirteen miles of the road between Colfax and Dutch Flat will be grated by the first of January. It is expected that the summit will be reached before the tunnel is completed, and that a temporary track will be laid over it for the purpose of facilitating the work on the eastern slope.

THE obsequies of General Wright and lady, last Saturday and Sunday, were of a very imposing character. A large military escort accompanied the remains from Cavalry Church to the Sacramento boat, the following distinguished persons acting as pall bearers: Major-General Halleck, Major-General Allen, Brigadier-General Hewston, Hon. Ogden Hoffman, Hon. H. P. Coon, Hon. O. C. Pratt, Hon Chas. James, W. C. Ralston, Esq., John Parrott, Esq., Colonel E. B. Babbitt, and Colonel H. Leonard. An escort of honor accompanied the remains on the boat, and a committee received them at Sacmento, also acting as pall-bearers at the funeral ceremonies—for the body of General Wright: Governor Low, Chief Justice Sanderson, Judge Sawyer, Adjutant-General Evans, C. H. Swift, Colonel E. McGarry, Major T. J. Blakeney, Controller of State George Oulton, Colonel G. W. Bowie, Robert Robinson, Paul Horeil and Edgar Mills. For the remains of Mrs. Wright—John Arnold, R. Pachero, J. G. McCullough, C. T. Wheeler, J. F. Houton, B. B. Redding, S. D. Smith, James Anthony, Geo. Newcomb and W. H. Taylor.

RESERVOIR AT FORDYCE VALLEY.—Daniel Rich left Nevada on Monday last, says the Nevada *Gazette* of the 25th, with a party of men, for the purpose of building a dam for the reservoir across the mouth of Fordyce Valley This, of course, will overflow the site of Fordyce City, and as that town has not grown as rapidly as its projectors anticipated, we presume no serious objections will be made to the construction of the dam. When the reservoir is completed, the water in Meadow Lake can be used for running quartz mills, then caught in the reservoir, from whence it can be run into the company's ditches as required. This is one object the company has in view in constructing the reservoir.

AN AFFRAY IN MONTEREY COUNTY.—A correspondent of the *Bulletin*, writing from San Antonio October 22nd, says:

At San Antonio Mission, Monterey county, on the 20th instant, two natives of Sonora, Mexico, were shot, but not mortally. It happened in this manner: Two Indians were fighting, when one of them seized a loaded rifle and tried to shoot the other, who, seeing the rifle pointed towards him, knocked the muzzle aside, when the discharge instead of hitting the one it was intended for, passed through (ramrod and all) the leg of Pedro Muños, lodging the rod in the foot, and the ball in the leg, of Jesus Valencia. The Indian who discharged the rifle was then pounded nearly to death by the other, who immediately gave himself up to the Justice. The wounded men were doing well.

☞ WE call the attention of our merchants and others in this place and neighborhood to the advertisement of Messrs. Dell, Cranna & Co., lamp and oil merchants of San Francisco. They are worthy gentlemen beside being reliable business men. A call on them by those dealing in their line will never be regretted.

go at large without a sufficient expiation of his misdeeds. We mean Democracy as a form of government. We have been told by all the political philosophers of the last half century, (and they appealed to all history to prove it,) that the moment any great question was presented to the American people, that could not be compromised, civil war would follow. We would be compelled to dictatorship, and we should add another to the long list of failures of democratical governments. Our own statesmen, indeed, basing their ideas of policy upon the study of other times and other peoples, carried the principle of compromise to a point beyond the sentiments of the people, in their endeavor to reconcile the opposing interests of the country. It was feared civil war would end in dissolution. It was declared that the nation could only be saved from anarchy but through the master-mind of some single man, or that we should become an aggregation of separate and discordant States, and lose, in eternal strife, the prosperity with eighty years of peace and the civilization of five hundred years had given us. We were advised by the statesmen of England and Europe to return to monarchy as the only stable form of government in the world, and modern despotism rubbed its hands in joyful anticipation of the death of civil liberty. But Democracy in America proved a different Democracy from any the world had before seen. Neither the fears of its friends nor the prophecies of statesmen, nor the hopes of its enemies have been realized. The most radical Democracy ever known has been subjected to the severest trial that can be applied to a government, and has stood the test. We are farther removed from anarchy than ever. We are bound in a more indissoluble Union. We do not owe our liberty to any single man. The people themselves have triumphed. Trained through eighty eventful years of trial to habits of independent thought and action, they presented to an astonished world the sublime spectacle of a whole people moved by a single impulse. There was no leadership, there was no molding of public opinion by any dominant mind. There was execution, energetic, comprehensive, brilliant; but it was dictated by the people, and sustained by them. With a full knowledge of the sacrifices to be made, they were submitted to; they demanded the nation's treasury to be filled, and pledged their last dollar to the payment of the nation's debt. They renewed the depleted ranks of the nation's army at the darkest hour of the rebellion, and to the confusion of despotism. At the severest hour of their trial they expressed, through the ballot-box, a public opinion that made resistance hopeless, and rekindled the sacred fires of liberty throughout the world.

"Themselves have made them free."

We would not detract from the fame of the noble men who, in this struggle, have so faithfully obeyed a nation's behest; but when the history of the rebellion comes to be written, the merit of its triumph must rest upon the people of the country. To them belong its sacrifices, its sorrows, its trials. There are vacant chairs at every fireside. There are orphans upon every hearthstone. There is poverty under too many roofs. They have borne the heat and burden of the day, and to them belong its coolness and its shade. Let them hold fast to this glory. Let them cherish this proud inheritance;—and through the holocaust of blood and ashes that lately spread over the land, there shall spring up to them and their children the flowers of peace and safety.—*San Jose Courier.*

PACIFIC RAILWAY SURVEY BETWEEN SALT LAKE AND HUMBOLDT.—The Salt Lake *Telegraph* of a late date mentions the return of S. B. Reed, Chief Engineer of the Pacific Division of the Union Pacific Railroad, and party of 13 from a surveying expedition to the Humboldt river. They would have continued their explorations down the Humboldt Valley but for lack of supplies. The Telegraph says:

The Pacific Division comprises the intervening space between the summit of the Rocky Mountains and the eastern boundary of California, the California Pacific Railway Company building the road eastward to the last named point. Mr. Reed and party left this city August 1st, to run a preliminary line hence to the Humboldt Valley. Commencing at the northwest corner of the city, they ran westward to and between Black Rock and Salt Lake, through Toole Valley, three miles north of Greenville, run round northeast point of mountain range into Skull Valleys and over the Cedar Mountains. Two lines were run to the desert—one by the way of Granite Mountain to Redding's Springs, near the north end of Go-shute Mountains; the other through a pass further north, to the desert, which the party could not prosecute further, owing to the absence of water. They therefore, moved around by and from Reding's Springs to the west side of the desert, and ran three lines over the Humboldt Mountains—a high and rugged range. The south line was run from the mail station in Ruby Valley through Hastings' Pass; the middle one from the north end of Ruby Valley through the Humboldt Pass; and the north line from near the junction of the forks of the Humboldt eastward through and easy pass into Clover Valley—thence to the desert to meet the line run to the desert from the east and discontinued through the difficulty of obtaining water. The northern line is the most direct, and Mr. Reed thinks it by far the most practicable—the other passes through the Humboldt range presenting considerable difficulties. By the northern line about 220 miles would carry the rails from this city into the Humboldt Valley, with no heavy work, and grades of not more than 60 feet to the mile through the Cedar Mountains, and 40 to the mile through the Humboldt range.

DESPERATE AFFRAY.—The San Francisco *Alta* gives the following version of an affray which occurred near Napa Valley on the 23rd instant: A man named John Clark was killed on the morning of the 23d inst., in Capelle Valley, near Napa Valley, by another named Frederick Coombs, said to be a brother of Nathan Coombs. The version of the tragedy we get is as follows: Coombs had a lease which was said to have expired, or was about expiring, when two brothers, Oscar and John Clark, with another man, went up to the ranch in Capelle Valley, to confer about transferring the ranch to the Clarks, they having the ranch, or the lease of it, on the expiration of the Coombs' lease. While at the house of Coombs a dispute arose, which culminated in the death of John Clarke by knife wounds, and the cutting of his brother Oscar in the hand and arm. One blow of the knife cut John over the eye, penetrating the brain, and another under the shoulder, killing him almost instantly. Coombs came into Napa City and surrendered himself to the authorities. The wounded brother, states that Coombs attacked him and the deceased without provocation, and Coombs states he was attacked by the Clark brothers, and sized the knife in defense, with the fatal result. The tradgedy is under investigation by a Coroner's jury.

ZACH STILL LIVES.—Zach Montgomery, the successor of crazy Pickett, lately delivered a lecture at Stockton, which the *Independent* notices:

The audience assembled at the City Hall last evening, to hear the lecture of Zach Montgomery on "The Moral, Social and Political depravity of our Public Schools," was the smallest we ever saw in the hall on any occasion of public speaking. He said that he had been engaged five years in discussing the matter. If his receptions in other places are no more encouraging than that of last evening he must certainly despair of success in the work he has undertaken. He had better go at once and help the "old fellow we read about" to roll a stone up hill through all eternity. The chances of Montgomery getting to the top of the hill with the bowlder are quite as good as his prospects of success in overthrowing the New England common school system. His hobby is the "law of nature," so is it an Indian's.

UNITED STATES 7-30 LOAN.

BY AUTHORITY OF THE SECRETARY OF THE Treasury, the undersigned has assumed the Genera Subscription Agency for the sale of United States Treasury Notes, bearing seven and three-tenths per cent. interest per annum, known as the

SEVEN-THIRTY LOAN.

These Notes are issued under date June 15th, 1865, and are payable three years from that time, in currency, or are convertible, at the option of the holder, into

United States 5-20 Six per cent.
GOLD BEARING BONDS

These bonds are now worth a premium of nine per cent, including gold interest from November, which makes the actual profit on the 7-30 loan at current rates, including interest, about 10 per cent. per annum, besides its EXEMPTION FROM STATE AND MUNICIPAL TAXATION, WHICH ADDS FROM ONE TO THREE PER CENT. MORE, according to the rate levied on other property. The interest is payable in currency semi-annually, by coupons attached to said notes which may be cut off and sold to any bank or banker:

The interest amounts to
One cent per day on a $50 note.
Two cents per day on a $100 note.
Ten cents per day on a $500 note.
Twenty cents per day on a $1,000 note.
One dollar per day on a $5,000 note.

Notes of all denominations named will be promptly furnished upon receipt of subscriptions. This is

THE ONLY LOAN IN MARKET

now offered by the Government, and it is confidently expected that its superior advantages will make it the

Great Popular Loan of the People.

Less than $300,000,000 of the loan authorized by the last Congress, are now on the market.

This amount at the rate at which it is being absorbed, will all be subscribed for within four months, when the notes will undoubtedly command a premium, as has uniformly been the case on closing the subscriptions to other Loans.

In order that citizens of every town and section of the country may be afforded facilities for taking the loans, the National Bank, State Banks, and Private Bankers throughout the country have generally agreed to receive subscriptions at par. Subscribers will select their own agents, in whom they have confidence, and who only are to be responsible for the delivery of the notes for which they receive orders.

Subscription Agent, Philadelphia.

ADDENDUM.

PER OVERLAND TELEGRAPH!
PHILADELPHIA, May 17th, 1865.

2d Series all sold. Commenced on third Series. Two Hundred and Thirty Millions (230,000,000) precisely like other two Series, except dated 15th July, and Government reserves the right to pay six per cent. in Gold instead of 7-30 Currency.

Lebanon Mining Company, Prospect Hill, Placer County.

NOTICE is hereby given that at a meeting of the Trustees of the above named Company, held at the office of the company on Prospect Hill, on the 18th day of October, 1865, an Assessment of Three dollars per share, was levied upon the capital stock of said company, payable to the Secretary, at his office on Prospect Hill, in United States gold and silver coin. Any stock upon which said assessment shall remain unpaid on the 18th day of November, 1865, will be advertised as delinquent, and unless payment be made before, will be sold on the 29th day of November, 1865, to pay the delinquent assessments together with the costs of advertising and expenses of sale. H. T. KELLER, Secretary.
Oct. 21 1865. 1m

Excelsior Gold and Silver Mining Company, Excelsior District, Nevada County.

NOTICE.—There is delinquent upon the following described stock of the above named Company, on account of assessments, levied August 26th, 1865, the several amounts set opposite the names of the respective shareholders, as follows:

Names.	No. Cert.	No. Shares.	Am't.
W. H. Thomas	98	10	3 00

And in accordance with the laws of the State of California and an order of the Board of Trustees, made on 13th day of October, 1865, so many shares of each parcel of said stock as may be necessary will be sold at public auction to the highest bidder for cash, in United States gold coin, in front of the office of the Company, in Dutch Flat, Placer county, on the 13th day of November, 1865, at 11 o'clock, A. M., to pay said delinquent assessments, together with the costs of advertising and expenses of sale.

JOHN MEYER, Secretary,
Oct. 13 tds Office, Main street, Dutch Flat.

NOTICE.

AT a meeting of the Board of Trustees of the Excelsior Consolidated Gold and Silver Mining Company held on the 7th day of October, 1865, the following order was ordered for publication: That the sale of Tennessee Carriger, William Jackson, and A. Wedekind's stock, sold on the 15th day of July, 1865, was illegal and therefore null and void. The following is a list issued for the stock sold on that day:

Number.	Shares.

ARRESTED.—Captain John S. Hill, was arrested at Suisun on the 25th and carried to San Francisco for trial by Military Court Martial. From what we can learn from exchanges it appears that during his term of service in the army and while marching his company on the plains he came across a dead squaw with a live infant at the breast, when Hill ordered the woman to be scalped and the child to be thrown over a precipice. For this unhuman butchery he is to be tried, and if guilty should be punished severely. For arresting this man the San Francisco *Examiner* says that "General McDowell's order is nothing more nor less than treason against the State. It is unauthorized by law and an open declaration of war." Possibly it may be; but then the "declaration of war" is against such persons as scalp women and murder infants.

GEO. H. GAZLEY, was one of the victims on the steamer Yosemite, and his body was found at Rio Vista. Mr. G. was for many years a resident of this county, first at the Grizzly Bear House, between Yankee Jims and Auburn; then at Auburn: afterwards at this place and on the road leading from here over the mountains. He leaves a mother in San Francisco and a wife in the Atlantic States. He was originally from Putneyville, Wayne county, New York, and was about 39 years old.

GOOD APPOINTMENT.—We see that Governor Low has appointed Mr. O. W. Hollenbeck, of Gold Run, as one of the Notaries Public of this county. This is a good appointment, Mr. H. being in every way competent, besides, he is an honest, conscientious man, one in whom his neighbors have every confidence.

FOR CONGRESS.—The Copperheads of the State of Nevada have nominated for Congressman, H. K. Mitchell, formerly of Marysville, in this State, Mr. Mitchell is a lawyer of fair abilities, but what we can learn, of no force as a moral or sober citizen, and the people of our sister state have an opportunity of becoming cursed with all the disgrace heaped upon our own State by McDougall through Mitchell—should they elect him- without the gigantic intellect or classic learning of the inebriate.

NOMINATED.—Frank Tillford the broken-down Copperhead politician, and the second fiddle to the Duc de Gwinn, has been nominated to the State Senate by the Copperheads of Storey county, Nevada. His chances for an election are exceedingly small.

THE thanks of this establishment are due to Mr. Loomis, news dealer of San Francisco, for a large bundle of Eastern papers by the last steamer. Such favors as this are always duly appreciated by us, and Mr. Loomis can "repeat" as often as he pleases.

MR. RICHARDSON, of Gold Run, has opened a tobacco, cigar and fruit store, where he is prepared to serve all who may give him a call.

SOUTHERN ESTIMATION OF COPPERHEADS.—The Albany *Evening Journal* reports the son of a distinguished Southern statesman, now visiting the North, as saying:

"We are loyal—the great mass of us—far more loyal than some of your own people. You can far better afford to trust us than you can your miserable Copperheads. They are the vilest offscourings of the earth. Had it not been for them we should not have rushed into war. And yet they have the impudence to came to us, claiming to be our friends, advising us to be stiff-necked, and asking us to strike hands with them and form a new alliance. The vipers! They have cheated us once; they will never cheat us again. We had rather trust the vilest abolitionist that ever howled and hounded us down, than the best of them.

"DELVOS" came too late for this issue. Correspondents would confer a favor by sending their communications in on Thursday evening. Delvos will pleas continue.

PALL BEARERS.—the following were the pall-bearers of General Wright at the San Francisco obsequies: Major General Allen and Brigadier General Hewston, of the militia; Judges Hoffman and Pratt, Mayor Coon, Collector James, William C. Ralston, John Parrott, and Colonels Babbitt and Leonard.

THE discriminating editor of the Virginia City *Enterprise* lately attended a Copperhead County Convention, and obtained the opinion that the "presence of Bigler and Weller alone was wanting to convey the illusion that there had been a resurrection in some old Democratic graveyard.

"DEMOCRATS WON'T COME OUT."—After the Copperheads contest two or three more elections and are badly beaten "because Democrats won't come out," they will get it through their heads that the "Democrats" are not in to come out. After a while they will consent to admit the fact that the Democratic party is dead. There is no power existing competent to perform miracles.

THE Placerville *Recorder* says that the first Temperance society in California was started by two soldiers of Lippitt's Company of Stevenson's regiment. The men at the time were incarcerated in the guard house, in Los Angeles, for drunkenness, and on becoming sober and repenting of their folly, were induced by the officer of the guard to sign the pledge. Thirty others speedily followed their commendable example.

CALIFORNIANS should test the merits of DR. HOSTETTER'S STOMACH BITTERS. Wells it is highly palatable as a beverage, it is unequalled as a tonic and invigorator. In the pursuit of fortune at the mines, many persons are exposed to the attacks of complaints of the digestives organs, and various kinds of fever. It is the very article that has so long been in demand in the mines. Its daily use will restore the tone of a deranged stomach, impart fresh vitality to the digestive functions, and cheer the spirits. Yet the Bitters is the safest of all stimulants. Let the miner who is exposed to hot and dry, wet and cold, be certain to obtain a supply of the genuine Hostetter Bitter, and he will find it a certain safeguard to health. [je17-1m

HOPE FOR THE AFFLICTED.—In another part of this paper will be found the advertisement of the celebrated Institute established by Dr. J. C. YORKE, in 1850, for this age of deceit and charlatanism it is a boon to the suffering to point out to them where they are sure of obtaining the wished for relief and cure. Under the care of the skillful Doctor the sick and troubled can divest themselves of their burdens of pain; lay aside their cross, and secure health and happiness. If you are sick or in trouble, do not hesitate. Read the advertisement and follow the advice. Do not forget the number nor the manner of directing your letters. Medical Advice.—DR. WM. K. DOHERTY'S Medical and Surgical Institute is becoming a *sine qua non* to the welfare of our State and health of our citizens; and his rapidly spreading reputation, although it may excite surprise, is but the signal of skill, and follows as the natural result of such a cause. We are personally acquainted with gentlemen who had suffered for years under chronic disease, and who had taken advantage of every available means that promised relief, but without success, until they called upon Dr. Doherty, who, in an incredibly short space of time, has given them entire relief. It is gratifying to announce this fact, because the Dr. is a gentleman who seeks, not by defamation of others, to establish his reputation or ruin of another's fame. The Doctor conducts his own Institute in such a manner that must be gratifying to all his patients. He examines, advises, and recommends without charge, and the patient, after hearing his terms for treatment, can accept or reject at pleasure. In no case does the Doctor make a charge, unless he effects a cure. This he is able to do, because he feels the confidence which long experience has given, and no doubt the consolation which appertains to that con fidence. Persons afflicted with either acute or chronic disease, would do well to consult the Doctor; at all events, it can do no harm, as for consultation he asks no fee; nor does he insist on obedience to his advice unless the patient places himself under his care. His offices are on Sacramento street, opposite the Pacific mail Steamship office.—*S. F. News.*

DISTRICT COURT SUMMONS.
STATE OF CALIFORNIA, County of Placer. District Court of the 14th Judicial District of said State.
The People of the State of California, To Johanna Vogel, Ephriam Vogel, Rachel Vogel, Rebecca Vogel, Sarah Vogel, Edwin Vogel and S. Heyman, Greeting:
YOU are hereby summoned to answer the complaint of E. L. Bradley in said Court, filed against you, within ten days from the service of this Writ exclusive of the day of service, if served on you in this county, but if served on you without said county, and within said District, twenty days; and if served on you without said county and District, then in forty days from the service, exclusive of the day of service, in an action commenced on the 7th day of April, 1864, in said Court, to obtain a judgment against you, S. Heyman, administrator of the estate of Louis Vogel, deceased, for the sum of One hundred ($100) dollars and interest thereon from May 9th, 1861, at the rate of 2½ per cent. per month, alleged to be due to Plaintiff on a certain promissory note of Louis Vogel, deceased, of the date and for the amount above mentioned, and also for a decree of foreclosure against certain property mortgaged by the said Louis Vogel, deceased, to secure the payment of the same and that the interest or claim of all the defendants above named in and to said mortgaged property be declared subsequent to and subject to Plff's said mortgage, and also for costs of suit, all of which you will find more fully set out in complaint on file a certified copy of which is herewith served, and you are hereby notified that if you fail to answer the complaint as directed, Plff will take judgment against you by default as prayed for in complaint and apply to the Court for the relief demanded.
In witness whereof, I, D. W. Spear, Clerk of the Fourteeth Judicial District Court aforesaid, (L.S. 50c) do hereinto set my hand and impress the Seal of said Court, at office in Auburn, this 8th day of April, 1864.
(L. S.) D. W. SPEAR, Clerk.
It appearing to my satisfaction by the affidavit of E. L. Bradley, the above named plaintiff that the deft's Rachel Vogel, Sarah Vogel, Rebecca Vogel and Edwin Vogel above named have departed from the State of California; that their present residence and the residence of each of them is to the pl'ff unknown, and it likewise appearing that pl'ff has a good cause of action herein and that the above named Rachel Vogel, Sarah Vogel, Rebecca Vogel and Edwin Vogel are necessary and proper parties to said action, and that summons has been issued in said action, on motion of Tweed & Craig, atty's for Pl'ff., it is ordered that service of the summons in said action, (hereto annexed) be had upon said deft's, Rachel Vogel, Sarah Vogel, Rebecca Vogel and Edwin Vogel by the publication of said summons in said action in the THE DUTCH FLAT ENQUIRER, a newspaper printed and published at Dutch Flat, in the County of Placer, once a week for the period of three months.

NEWS OF THE STATE.

TAKEN FROM OUR EXCHANGES.

THE Marysville *Appeal* relates the particulars of a desperate fight which occurred in Yuba county, on the 20th instant, in which Mr. Barner was dangerously shot by Mr. Shaffer. Shaffer's son was also received a stray bullet in the face. The affray was started by remarks made by Shaffer in relation to the conduct of Barner's daughter. Barner hit Shaffer a heavy blow on the head, when he turned around and seized a carbine, which was near at hand, cocking the gun as he wheeled. At the same time Barner drew a five-shooter, cocked it, and commenced to fire on Shaffer—Shaffer at the same instant firing on Barner. Barner fired five shots in rapid succession, and as he was falling Shaffer approached and broke his gun-stock over his head. Inlow then seized hold of Shaffer, and as he grappled him Shaffer fell on Inlow's knees. Barner by this time had partially recovered from the blow and advanced towards Shaffer as he partially rested on Inlow. As he approached Inlow said. "Stop, you have killed him." Shaffer at this instant fell to the floor and died, and Inlow seized Barner and laid him upon the bed. On the examination of Shaffer's body it was found that four shots took effect as follows: One ball passed through the side of his neck, one near and over his heart; one near the pit of the stomach. The carbine fired by Shaffer was loaded with three balls, and the whole charge struck Barner near the pit of the stomach and passed out the right side of the back, excepting one ball which lodged in the skin—carrying away the side and wounding the liver. During this shooting a son of Mr. Shaffer, about twelve years of age, took refuge behind a stove, where by some means a ball from Barner's pistol struck him in the neck, inflicting a serious if not mortal wound. Mr. Barner was alive yesterday afternoon, but was not expected to live through the night. Barner died of his wounds on Saturday, the 21st instant. Young Shaffer, is recovering.

ONE day last week a serious affray occurred at the Sair ranch near this place, in which two persons were seriously injured, viz: Charles S. Fairfax, Esq., and Juan Peralta. The difficulty occurred in relation to some land claimed by both parties, the title of which is in dispute, or at least there is litigation connected with it in some manner. It seems that Peralta was enjoined from using said land, and had entered upon the premises, when Fairfax met him, and after a few words, the nature of which we were unable to ascertain, Peralta struck Fairfax on the head with a club, felling him instantly, and was about to deal a second blow which would undoubtedly have killed him, whem Mr. Snowden who was present, Shot Peralta in the thigh, which brought him down. Mr. Fairfax was conveyed to his residence, where medical attendance was procured, and he is fairly recovering. Peralta's injuries are severe; he was taken to his abode near by, immediately after the occurrence.—*Marin County Journal.*

ON Wednesday last, about one o'clock P. M., D. S. Turner, Postmaster of Columbia, died suddenly of palpitation of the heart. At the time of his death, his wife was in the store, and had asked for some article which he turned to reach, when he was seized with the dreadful disease, and turning with his face to his wife, fell dead. Mr. Turner was an old and estimable citizen of Columbia, enjoying the confidence and esteem of all who knew him. He leaves a young wife and infant child.—*Tuolumne Courier.*

A FATAL shooting affray occurred near Jamestown, about sunrise, on the morning of the 23rd inst., growing out of a disputed title to a quartz claim. The fight was between W. N. Harris on one side and H. W. Williams and Shirley on the other. Williams was killed, being shot through the body, the ball entering under the right arm. Shirley was dangerously wounded, being shot in two places, one ball striking him in the stomach. Harris was shot through the left arm.

WE learn, says the Marysville *Express*, from reliable authority, that the laying of the rails from Lincoln to Marysville will be commenced as soon as General Wilson arrives from New York, which place he was to leave by the steamer of the 18th of October. Part of the iron has already arrived at San Francisco, and the balance is on the way.

Three horse thieves were arrested in Monterey, last week—a Californian named Espinoza, and two white men, named Jones and Hamilton. They are all in the Monterey jail. Hamilton has confessed his guilt, telling where a large number of stolen horses are secreted, and implicating other parties with himself.

THE Grand Jury of Colusa county have indicted General McDowell for kidnapping the District Attorney and one of the Justices of the Peace of the county. A correspondent says: If you are a friend of the General's, you will advise him to leave by the next steamer for the United States. What a farce.

THE San Jose *Courier* says: We learn from Mr. Savage, United States assessor for this district, that 56 barrels of crude coal oil were shipped by the Stanford Oil Springs Company during the month of September, from Santa Barbara county to San Francisco. The revenue tax is one dollar per barrel.

THE Stockton *Herald* says that the railroad to Copperopolis is under such headway that its completion may be looked upon as a fixed fact. At the present rate of freight it would pay the Union mines alone, to build the road for its own private use.

The *Sentinel* attributes the prosperity of Santa Cruz to the many manufacturing establishments in that place, which pay out every month over $25,000 in gold for labor, all of which is there spent for improvements and the necessaries of life.

R. B. Hall, under-Sheriff of Santa Clara, lately had a most exciting chase after a Spanish murderer. He had the fellow on horseback all day and into the mountains, where, unfortunately the Sheriff's horse gave out.

One locomotive belonging to the Sac. V. R. R. Co., is now running one hundred and sixty-four miles every twenty-four hours, and another over one hundred and twenty miles, over the Sacramento Valley and Placerville road propelling freight.

The Visalia *Delta* says three large grizzlies were killed by one party last week on the waters of the North Fork of the Kawiah. They were after pork, and one of them weighed eight hundred pounds. His Bearship died hard, requiring sixteen balls of various caliber to finish him up.

The *Courier* says that "the spiritualists in Columbia are spreading themselves." We believe this is not the first instance of the spiritualists giving a similar performance.

The Folsom *Telegraph* says that a miner there who was nearly dead with inflamatory rheumatism, cured himself by the use of kerosene, applied externally and also taken inwardly.

A man at Napa, after having chopped wood twenty years, cut his big toe off the other day. He thinks experience is not providence against accidents.

The Marysville *Appeal* mentions a report that the California Stage Company have sold their Oregon stage line, including coaches and stock, to the Pioneer Company.

The editor of the San Andreas *Register* says that preparations are being made at Murphy's to open some of the quartz veins in which that region abounds.

The manufacturing of blasting and gunpowder is now successfully prosecuted in Santa Cruz county, 40,000 kegs are said to have been made there the last year.

The Stockton *Independent* says: On Thursday night last, the flour mill of C. C. Reynerson & Waeler, at Linden, was totally destroyed by fire.

James Sawyer, formerly of the United States Navy, died at Napa, recently, and was buried at Mare Island.

STORY OF A HANDKERCHIEF.—Oliver Wendell Holmes, having received from Capt. Beaman, of a Vermont regiment, a handkerchief belonging to his son, Oliver W. Holmes, Jr., which had been picked up on the Ball's Bluff battle field, wrote a letter of thanks in these words:

"I have just received the handkerchief which you have had the kindness to send, and I return you the most greatful acknowledgments for it. His mother unfolded it and said, as she read his name, 'I marked it.' To you it was a curious relic, and as such I can understand that you valued it, and only parted with it from a generous impulse which is honorable to your feelings. But to us, and to our children's children it is, and will be something more than a relic, it records the baptism of blood of my first-born on one of the most dreadful fields of this hard-fought war. My son has the Minnie bullet which tore his breast on that fatal day. He has the large ball from a spherical case which was dug out of his heel at Fredricksburg. But this handkerchief, returned after so long an interval, calls up the recollection of that day when he was so near death, more vividly than any other momento could do, and will always be precious to him and all of us."

CAST A LINE FOR YOURSELF.—A young man, poor and dejected, stood watching some anglers on the bank of a stream. At length, approaching a basket well filled with fine fish, he sighed: "If now I had these, I would be happy. I could sell them at a fair price and buy me food and lodging."

"I will give you a good fish," said the owner, who chanced to overhear his words, "if you will do me a trifling favor."

"And what is that ?" asked the other eagerly.

"Only tend this line till I come back; I wish to go on a short errand."

The proposal was gladly accepted. The old fisherman was gone so long that the young man began to be impatient. Meanwhile, however, the hungry fish snapped greedily at the baited hook, and the young man lost his depression in the excitement of pulling them in, and when the owner of the line returned, he had caught a large number. Counting out from them as many as were in the basket and presenting them to the young man, the old fisherman said:

"I fulfil my promise for the fish you have caught to teach you that whenever you see others earning what you need, to waste no time in fruitless wishes, but to cast a line for yourself."

"A POOR RULE," ETC.—A few days since, writes an attorney, as I was sitting with brother C., in his office in Court Square, a client came into the office and said:

'Squire, the stabler shaved me dreadfully, yesterday, and I want to come up with him.'

'State your case,' says C.

'I asked him,' said the client, 'how much he'd charge me for a horse to go to Dedham. He said one dollar and a half. I took the team, and when I came back I paid him one dollar and a half, and he said he wanted another dollar and a-half for coming back, and made me pay it."

C. gave him some legal advice, which the client immediately acted upon. He went to the stabler and said:

'How much will you charge me for a horse and wagon to go to Salem?'

'Five dollars,' replied the stabler.

'Harness him up.'

Client went to Salem, came back by railroad, went to the stable, saying:

'Here is your money,' paying him the five dollars.

'Where is my horse and wagon?' says the stable man.

'He is at Salem,' says the client, 'I only hired him to go to Salem.'—*Boston Paper.*

THE END OF THE WORLD.—Almost all European writers, whatever their subject, politics or society, now tacitly assume that the human race is to progress forever, or, to state their latent idea more strictly, is to advance steadily, for an indefinite period, towards a nobler life and a higher civilization. The idea of a fixed term to history, which so greatly influenced the Middle Ages, has utterly disappeared; the semi-religious belief of a cataclysm to occur at a distant but visible date, though still entertained, has ceased to be professed by anybody but Dr. Cummings, and does not influence him. The reverie of the politician is not of the coming overturn of all things—an idea never absent from the great minds of the first four centuries—but of a coming millennium, when all mankind shall be allied, and the motive force of the European, and the subtle brow of the Arab, and the deft hand of the Mongol shall be employed together in making earth more lovely and convenient for its people.

FATALITY AMONG HORSES.—There has appeared among the horses of Mr. J. B. Ager, on Willow Creek, Shasta Valley, a singular disease, which in almost every case proved fatal to the animal.—When the horse is first attacked he appears quite ravenous, eating everything within his reach, and remains on his feet until he falls over, when he dies without a struggle. Dissection shows the blood to be very thick and putrid. No reason as yet has been ascertained as to the cause of the disease. The same fatality has also existed among the horses of Mr. Mott, on the Horsely ranch, who seems to attribute it to alkali water and the thickening of the blood, and recommends free use of sulphur as a preventive.—*Yreka Journal.*

ADVICE TO YOUNG PEOPLE.—Keep good company or none.—Never be idle.—If your hands cannot be employed, attend to the cultivation of your mind.—Always speak the truth.—Make few promises.—Live up to your engagements.—Keep your own secrets, if you have any.—When you speak to a person, look him in the face.—Good company and good conversations are the very sinews of virtue.—Good character is above anything else.—Your character cannot be essentially injured, except by your own acts.—If any one speaks evil of you, let your life be so that no one will believe him.

TRUE LIFE.—The mere lapse of years is not life. To eat, drink and sleep, to be exposed to darkness and to light; to pace round in the mill of habit, and turn the wheel of wealth; to make reason book keeper, and turn thought into an implement of trade, this is not life. In all this but a poor fraction of the unconsciousness of humanity is awakened; and the sanctities of life still slumber which make its highest worth, while knowledge, truth, love, beauty, goodness, faith, alone can give vitality to the mechanism of existence; the laugh of mirth which vibrates through the heart, the tears which freshen the dry wastes within, the music that brings childhood back again, the prayer that brings the future near, the doubt which makes us meditate, the death which starts us with mystery, the hardships which force us to struggle, the anxiety that ends in trust—are the true nourishment that ends in being.

QUICK CURES, SMALL CHARGES.

ELERTROPATHIC INSTITUTE,
645 Washington Street, San Francisco,
ESTABLISHED FEBRUARY, 1860, BY AN ASSOCIATION OF SCIENTIFIC GENTLEMEN FOR THECUE OF DISEASES, AND THE SUPPRESSION OF QUACKERY.

Truths for the Afflicted.

This splendid establishment was inaugurated in February, 1860, by an association of Scientific gentlemen, that there might be a Medical Establishment in San Francisco, where the afflicted could find scientific and honorable, as well as humane treatment. *Outrageous Quackery* had so long run rampant over afflicted humanity that all confidence was being lost in the Medical Profession, and it was time that there should be an Institute where the afflicted could apply with the certainty of honorable and Scientific treatment. And the result has thus far exceeded the most sanguine expectations of its founders.

Thousands have been made to rejoice in returned health who had been trifled with by the numerous vampires that abound upon this coast, the chief of whom has been obliged to close out and leave the country; but still there are some left of whom the afflicted should beware.

The basis of the treatment at the Institute is the Electropathic System. The Physician and Surgeon who has been a Professor in one of the best Medical Colleges in America, and who has made a special study of Chronic Diseases for the last fifteen years, is thoroughly qualified to treat by medicine, and will warrant a perfect and permanent cure in the shortest possible time. All long-standing cases of disease no matter what may be their nature, give way under the course of treatment pursued at the Institute, and the result is perfect health and a strengthened constitution where it has been injured.

It would be useless to enumerate the diseases as it would be occupying space to no purpose. Every nameable complaint to which humanity is liable can be cured by the faculty at the Institute.

No mercury is used upon any consideration. All medicines prescribed are vegetable, and in cases where the patient can remain in the city, and wishes to be treated by Electricity, no medicines will be used. All medicines are electrized, which makes them much more active, and destroys all nauseous taste, making them as palatable as wine.

The Directors wish to speak of specialities more extensively than of other complaints, because empirics have used more deception about them than they have about the regular troubles of the human family. And first on the list is that dreadful malady denominated Seminal Weakness, or Spermatorrhœa, a complaint which not only affects the body with pain and lassitude, making life a burden, but affects the brain, creating *Insanity*. It drives more men to the mad house than all other diseases added together. By the Electropathic System this terrible trouble gives way, and the hitherto emaciated victim is made to rejoice in perfect health.

Next upon the list is Venereal, in all of its terrible forms and phases.

It is impossible to paint this disease in colors sufficiently terrible to do it justice. It is the most awful disease to which the human family is liable, and if not arrested when active, making him a loathsome mass of living corruption. It is also one of the most insidious diseases in the world. While the exterior shows no symptom, the orrible disease is sapping the foundations of life, preparing to attack its vital parts, as soon as the patient shall by some indiscretion weaken the system. Reader, if you have ever had this awful disease in any form whatever, call at once at the Institute, and the physician there will examine you and tell you if you have any of the virus in your blood. In such cases consultations are always gratis, and should you have any of the dreadful complaint about you, a cure will be warranted in a short time, or no charges will be ade for serviecms.

Strictures.

This terrible affection, which badly affects the nervous system as to prevent sound and health giving sleep, should be attended to in its early stages, or an operation both painful and dangerous will have to be resorted to. It is usually first indicated by darting pains in the parts, but very light and hardly noticeable at first, increasing gradually, until they become troublesome, sometimes accompanied by slight irritations in the passage of urine—A *quick cure* is easily performed at the Institute if early application is made.

To Females.

Your delicate organizations should be treated with great scientific care. At the Institute you will find a kind physician, who can at once discover your disease or trouble, and sympatize with you in your affliction. Should you be irregular you can get relief, no matter what may be the cause. You need not fear to call on account of the delicacy of consultation for the utmost secrecy will be insured at all times, and the resident physician will treat you in the most honorable manner, giving you all the assistance and advice, both medical and surgical, that you may require. *Private apartments, especially for Ladies.*

Preventive.

Dr. J. H. Josselyn's celebrated Preventive for married ladies can be obtained only at the Institute. Price, Ten Dollars.

Warranted to prevent pregnancy. Can be used without any inconvenience, and is good for one year if directions are followed.

This Magnetic Preventive is not infurious, but is conducive to health, and can be used without the knowledge of any one but the party using it.

To sum up, there is no place where the medical profession is practiced in the State of California, wherein the same amount of scientific attainments are employed, and, consequently, where the afflicted can be so well treated, and be as sure of a cure, as at the Electropathic Institute, 645 Washington street, (south side,) a few doors below Kearny.

Reader, if you are sick and need medical assistance call therebefore employing any one else, and judge for yourself. You will there find the best consulting, as well as the best operating talent in the State, together with the only Electropathic Instrument that can be depended upon in the curative process.

Medicine sent to all parts of the State, Oregon and Nevada, upon the receipt of a letter describing the case.

All letters must be directed to J. H. JOSSELYN, M. D., Resident Physician, Electropathic Institute.

Dr. H. JOSSLYN has no connection with any other establishment or Institute in this city.

All letters answered with promptness and pleasure, and the utmost secrecy observed. Address

PRIVATE MEDICAL AID.
Quick Cures and Moderate Charges.
DR. W. K. DOHERTY'S
Private Medical and Surgical Institute,
Sacramento Street, below Montgomery, opposite the Pacific Mail Steamship Co.'s Office.
Private entrance on Leidesdorff st.,
San Francisco.
Established expressly to afford the afflicted sound and Scientific Medical Aid, in the treatment and cure of all Private and Chronic Diseases, cases of secrecy and all Sexual Diseases.

To the Afflicted.

DR. W. K. DOHERTY returns his sincere thanks to his numerous patients for their patronage, and would take this opportunity to remind them that he continues to consult at his Institute for the cure of chronic diseases of the Lungs, Liver, Kidneys, Digestive and Genito-Urinary Organs, and all private diseases, viz: Syphilis in all its form and stages, Seminal Weakness, and all the horrid consequences of self-abuse, Gonorrhœa, Gleet, Strictures, Nocturnal and Diurnal Emissions, Sexual Debility, Diseases of the Back and Loins, Inflammation of the Bladder and Kidneys, etc., etc., and he hopes that his long experience and successful practice will continue to ensure him a share of public patronage. By the practice of many years in Europe and the United States, he is enabled to apply the most efficient and successful remedies against diseases of all kinds. He uses no mercury, charges moderate, treats his patients in a correct and honorable way, and has references from men of known respectability and high standing in society. All parties consulting him, by letter or otherwise, will receive the best and gentlest treatment and implicit secrecy.

Dr. DOHERTY would call attention to the following certificates from two of his patients, who having fully recovered their health, desire to make known their remedial agent. It will be seen their statements are fully authenticated by a Notary Public.

The welfare of society imperiously demand their publicity, and they are given more to warn the unwary than to sound the praises of a Physician, of whom hundreds of like cases can be cited, during a practice of more than fifteen years.

Dr. Doherty—Dear Sir: I feel my health so fully restored, that in common gratitude, I believe I should make you some written acknowledgment for your valuable services—particularly so as your fee was small for the work performed.

I arrived in this city from the East about one year ago, and was then suffering from an old case of Gleet, complicated with Stricture. Being a stranger in this city, and believing those Doctors who gave such positive assurances of success were necessarily the best (some of whom have a large number of titles), I placed myself in their charge and continued under their treatment until I had lost nearly all hope and a considerable sum of money.

I wish to say now that you are the sixth Doctor I have employed, and the only one that has ever done me any service. My Gleet is wholly cured, the Stricture is all removed, and my general health is better than it has been for years.

In conclusion, I would say to the many unfortunates who require medical advice, if you have any doubt as to whom you may employ, ask Dr. Doherty for my address and call and see me. (I keep store in this city.) My experience may save you many dollars.

I would also add that in the early stage of my disease, I used a large amount of the preparations advertised as an infallible cure for Gonorrhœa, Gleet, etc., but never derived any benefit from them.

I am, Doctor, very truly yours, L—— H——.
San Francisco, June 16, 1864.
Subscribed and sworn to before me, this 21st day of June, A. D. 1864.
[L. S.] A. S. GOULD, Notary Public.

SEMINAL WEAKNESS—A SWORN-TO CERTIFICATE OF MOST REMARKABLE CURE OF SPERMATORRHŒA.

A desire to benefit humanity, and a feeling of gratitude to Dr. W. K. Doherty, alone induces me to make this statement. For many years I have been afflicted with that fearful disease known as "Spermatorrhœa," or Seminal Weakness, the result of selfabuse, but till 1855 experienced but little trouble or inconvenience. In that year however, I had Seminal weakness to an alarming extent, which was soon followed by the most alarming symptoms as weakness of the back and limbs, pain in the head, dimness of vision, nervousness and general debility. My mind, too, was afflicted to such an extent as to seriously impair my memory; my ideas were confused and spirits depressed. I was averse to society, had evil forebodings and self-distrust, and was entirely unfitted for any of the duties of life. From 1855 to the summer of 1863, I employed the very best medical talent I could find, and spent several hundred dollars, but in no instance obtained more than temporary relief. I had about concluded there was no relief for me in this world, but seeing Dr. Doherty's advertisement, I thought I would call and see him, as he charged nothing for consultation. I had an interview with Dr. Doherty at his office, in Sacramento street, and his fee for treatment was so reasonable, I determined to try him, though I did not expect much benefit from his treatment. On the 5th of December last I placed myself under his care; in one week I found myself very much improved, and now, after five weeks' treatment, I feel myself thoroughly cured of all my troubles and in the enjoyment of the best health. Hoping that my experience may be of benefit to others similarly afflicted, I subscribe myself JAMES JOHNSTON.
Subscribed and sworn to before me, this 15th day of January, A. D. 1864.
[L. S.] A. G. RANDALL, Notary Public.

To Females.

When a female is in trouble, or afflicted with disease, as weakness of the back and limbs, pain in the head, dimness of sight, loss of muscular power, palpitation of the heart, irritability, nervousness, extreme urinary difficulties, derangement of digestive functions, general debility, vaginitis, all diseases of the womb, hysteria, sterility, and all other diseases peculiar to females, they should go or write at once to the celebrated female doctor, W. K. Doherty, at his Medical Institute, and consult him about their troubles and disease. The Doctor is effecting more cures than any other Physician in the State of California. Let no false delicacy prevent you, but apply immediately and save yourself from painful sufferings and premature death. All Married Ladies, whose delicate health or other circumstances prevent an increase in their families should write or call at Dr. W. K. Doherty's Medical Institute, and they will receive every possible relief and help. The Doctor's offices are so arraged that he can be consulted without fear of observation.

To orrespondents.

Patients residing in any part of the State, however distant, who may desire the opinion and advice of Dr. Doherty on their respective cases, and who think proper to submit a written statement of such, in preference to holding a personal interview, are respectfully assured that their communications will be held most sacred. Dr. Doherty takes this opportunity of observing, that all letters are only opened and replied to by himself, and the latter as promptly as possible.

If the case be fully and candidly described, and the usual fee of ten dollars enclosed, (by express or in a registered letter) personal communication will be superseded, as instructions for diet, regimen, and the general treatment the case itself (including the remedies), will be forwarded without delay, and in such a manner as to convey no purport of the letter or parcel so transmitted.

☞ Consultation at the office FREE. By letter, $10 Permanent cure guaranteed, or no pay. Address,

HELMBOLD'S
FLUID EXTRACT BUCHU

Improved Rose Wash

Will radically exterminate from the system Diseases arising from Habits of Dissipation, at little expense, little or no change of diet, no inconvenience or exposure; completely superseding them with pleasant and dangerous remedies, Copaiba and Mercury, in curing the same diseases.

USE HELMBOLD'S
FLUID EXTRACT BUCHU

In all Diseases of the Urinal Organs, whether existing in MALE or FEMALE, *from whatever cause originating, and no matter of how long standing.* It is pleasant in its taste and odor, IMMEDIATE in action, and more strengthening than any of the preparations of *Iron or Iron.*

Those suffering from *Broken Down or Delicate Constitutions, procure the Remedy at once.*

The Reader must be aware that however slight may be the attack of the above diseases, it is certain to affect his *Bodily Health, Mental Powers and Happiness.* If no treatment is submitted to, Consumption or Insanity may ensue.

All the above diseases require the aid of a diuretic.

HELMBOLD'S EXTRACT BUCHU
Is the Great Diuretic.

HELMBOLD'S
HIGHLY CONCENTRATED
Compound Fluid Extract Sarsaparilla,

For purifying the blood, removing all diseases arising from excess and imprudence in life, chronic constitutional diseases arising from an impure state of the blood, and the only reliable and effectual known remedy for the cure of Scrofula, Scald Head, Salt Rheum, Pains and Swelling of the Bones Ulcerations of the Throat and Legs, Blotches, Pimples on the Face, Tetter, Erysipelas, and all scaly eruptions of the skin, and beautifying the COMPLEXION.

AND HAPPINESS

NOT A FEW

Of the worst disorders that afflict mankind arise from the corruption that accumulates in the Blood. Of all the discoveries that have been made to purge it out, none can equal in effect *HELMBOLD'S COMPOUND EXTRACT OF SARSAPARILLA.* It cleanses and renovates the Blood, instills the vigor of health into the system, and purges out the humors which make disease. It stimulates the healthy functions of the body, and expels the disorders that grow and rankle in the Blood. Such a remedy, that could be relied on, has long been sought for, and now, for the first time, the public have one on which they can depend. Our space here does not admit of certificates to show its effects, but the trial of a single bottle will show to the sick that it has virtues surpassing anything that have ever taken.

Two tablespoonsful of the Extract of Sarsaparilla, added to a pint of water, is equal to the Lisbon Diet Drink, and one bottle is equal to a gallon of the Syrup of Sarsaparilla, or the decoction as usually made.

The above Extracts are prepared on purely scientific principles—in *Vacuo*—and embody the full strength of the ingredients entering into their composition. A ready and conclusive test will be a comparison of their properties with those set forth in the U. S. Dispensatory.

HOW TO USE THE REMEDIES.

In Diseases of the Blood, Humors on the Face, or any and every part of the body, use Extract Sarsaparilla, applying to Pimples and all external Humors or Eruptions the Improved Rose Wash.

Use the Extract Buchu for all diseases requiring the aid of a Diuretic, except those of the Urinary Organs, such as Gonorrhœa and Gleet; in these use the Extract Buchu and Inject with the Improved Rose Wash.

☞ THESE EXTRACTS HAVE BEEN ADMITTED TO USE IN THE UNITED STATES ARMY, and also are in very general use in all the STATE HOSPITALS AND PUBLIC INSTITUTIONS throughout the land, as well as in private practice, and are considered as invaluable remedies.

THIS CELEBRATED INSTITUTE

has enjoyed on this coast an uninterrupted success of fourteen years, and has become one of the renowned Hospitals of the age. What the celebrated Lock Hospital is to London, and the no less renowned establishment of Ricord is to Paris, this Institute has become to the Pacific coast. The thousands annually received and cured place it in point of number of patients among the very first of the world, and the success of its treatment ranks it second to none.

PRIVATE DISEASES IN MALES and IRREGULARITIES IN FEMALES are the great destroyers of health. They insidiously attack the system and gradually undermine and destroy it; they drive the bloom from the cheek, the lustre from the eye, the strength and vigor from the frame; they give to the world a sickly and diseased offspring, and poison, through succeeding generations the race of man. The marks can be seen in Scrofula, Consumption, Cripples, the Idiotic, the Paralytic, the Insane, etc.

There is no more terrible scourge to the human race than those diseases arising from the contamination of Venerial Poison. The mildest forms, by retreating to the blood, hold over over the one afflicted, the sword of destruction that is liable at any moment to fall and blight—to utterly destroy—all earthly hopes.

MERCURY, *recognized as the most fatal medical enemy to man*, combining with the Venerial, doubles the dangers. Those who have been treated with that pernicious *mineral poison* are not cured: the disease has only assumed a new form.

Do not be Satisfied with Partial Cures

that leave the poison to crawl through the system, eating its way into the tissues and organs beneath the apparently smooth surface, to burst out in the future with a virulence that will baffle the effects of medicine. WHEN PERFECT CURES can be obtained by consulting a physician whom long practice and thorough investigation into the causes of DISEASES of the URINARY ORGANS enables to determine at once the nature of the disease.

SEMINAL WEAKNESS OR SPERMATORRHŒA.

The young man who experiences that growing weakness in his muscular and mental organization should stop to consider whence it arises. He will find in the weakness of the back, trembling of the limbs, disordered digestion, unaccountable failing of the powers of the mind, distaste for society, dread of impending trouble, forebodings of evil sleeplessness, troubled and lacrimose dreams accompanied
